MEDICAL SUPPORT

Emergency Medical Services

An appropriate response will be undertaken with a response vehicle dispatched immediately to the scene of a medical emergency, where appropriate lifesaving support will be provided, and where relevant, the patient will be stabilised before transfer is provided to the closest appropriate medical facility.

Medical Transportation and Evacuation

In the event of a medical emergency, the Echelon call centre will arrange for emergency medical transport to the nearest medical facility capable of providing adequate care. Medical considerations, the degree of urgency, your state and fitness to travel and other considerations, including, but not limited to, airport availability, weather conditions and distance to be covered (as assessed by the doctor and support staff) will determine whether transport will be provided by private medically equipped aircraft, helicopter, regular scheduled flight, rail or road.

Medical Information Line

Medical personnel, including paramedics, nurses and doctors, are available 24 hours a day to provide general medical information and advice. This is an information service, as a telephonic conversation does not permit an accurate diagnosis. In addition, inter-hospital transfer, medical repatriation, escorted return of minors and compassionate visits are included.

Please Note: This cover is only valid within the borders of South Africa. There is a limit of R25 000 per incident per annum.
